Central Park Sandyford, Co. Dublin, Ireland

Central Park Sandyford, Co. Dublin, Ireland

Project: Central Park, Sandyford, Co. Dublin.

Architect: Henry J Lyons Architects, Dublin.

Main Contractor: G + T Crampton.

Value: € 600 K (STG £516 K).

System: A fully bespoke steel and aluminium system was designed for this complex fire wall project. The glazing which is a 7 story internal glazed atrium, requires large elements of the glazing to be fire resistance. A special borosilicate glass was imported for the contract to perform this safety function.

The architectural feature at the floor slabs which is supplied in Natural Anodised AA 25 finish and the obscure glass spandrel panels was a joint development between HJL and GLF during a series of design workshops.
